

Planning a successful career can begin in high school!

The Center of Applied Technology South

High school students can attend the Center of Applied Technology South (CAT South) as part of their regular daily schedule. In each program, students can earn credits required for graduation.

Completion of any of the 13 programs at the Center provides students with a combination of technical and academic expertise that can be utilized in a variety of ways. All programs offer the background and experience needed for immediate employment. Many programs articulate with colleges and universities, so students can earn college credits while in high school.

The programs at CAT South offer the foundation for employment, knowledge about related careers and continuing education, and work study positions. Studies combine both academics and applied technology.

The Career Exploration Program

The Career Exploration program allows students to explore four programs in one semester and earn 0.5 credit. Career Explorations is taken during period 1B. Transportation is provided to and from CAT South.

Semesters	Programs	Credits
One	4	1/2 Credit

Students can experience the environment, equipment, materials, skills, and safety rules of their chosen technical areas. The information students gain can be of significant value in career planning and expanding their interests and abilities.

What is it?

The **Carpentry** program provides high school students with the opportunity to develop skills and knowledge about the field of carpentry. Studies encompass blueprint reading, cost estimating, and house construction, both exterior and interior.

This program emphasizes safe handling of hand and power tools. Students are provided experiences to practice and develop techniques that will be required in the trade. Applications of mathematics, science, and communication skills are incorporated into the program. Many related trades will also be taught to broaden students' understanding and abilities, including, painting, roofing, drywall finishing, sales, and independent contracting.

Skills and career development through the *National Center for Construction Education and Research's* (NCCER) training curriculum, provides students with industry recognized credentials in a national registry. Students are also guided in preparing a resume, a portfolio, and employment interview skills. There are several colleges that offer related courses leading to Associate of Arts or Bachelor of Science degrees.

Industry Certification

National Center for Construction Education & Research (NCCER)

- Core
- Carpentry Level 1

Occupational Safety & Health Administration (OSHA 10)

About the program...

You will:
